

Noise and Visual Intrusion

The company has a duty to our neighbours, the public and those who wish to enjoy and visit the local area.

Although we are in an industrial estate, we must still consider our neighbour's.

This does not only involve our immediate surroundings it includes approaches to the industrial estate.

To do this, we must take action to reduce the impact of noise and visual intrusion in the vicinity of the operating centre, the company will:

Reduce lights at night to a minimum, any security lights should not cause annoyance or discomfort to our neighbours or those passing, especially motorists.

Ensure all staff and drivers keep noise to a minimum.

Radios are not on full volume

Engines are not left running or revving for long periods of time

Park vehicles in use in the early hours away from any neighbours and nearest to the exit for ease.

Workshop staff keep the garage doors closed whenever possible to minimise the noise or workshop activities

All rubbish and waste are kept in designated areas and good quality containers with regular cleaning.

The exits are always to be kept clear.

Adopt an ethos of good husbandry for the benefit of the company, neighbours and public.
